

# ANGELLO MICHAEL LAZAR

Atlanta, GA | [angellolazar@gmail.com](mailto:angellolazar@gmail.com) | (404) 984-8686 | [angellolazar.work](http://angellolazar.work)

## PROFESSIONAL SUMMARY

---

Systems Architect with 5 years shipping systems for clients including an MCP server for thousands of users, a healthcare app across 3 local governments, and an institutional DeFi dashboard scaled to \$700M+ AUM. Former technical founder (Suave Tech, \$50K+/mo) with consulting across blockchain, healthcare, and AI.

## WORK EXPERIENCE

---

**Pump.fun** | Software Engineer, Livestreams Oct 2025 – Apr 2026  
*New York, NY*

- Spearheaded the deployment of an AI-native MCP server for thousands users to get intel and execute transactions
- Built custom HLS/DVR livestream player for mobile and web app serving 30K+ DAU reducing video load by ~30%
- Engineered real-time participant and cohost stage interactions increasing hosting time by ~17% using WS and NATS
- Implemented XP and DevX tooling, like a multi-context Launch Darkly XP system, increasing XP accuracy by ~10%

**August Digital** | Lead Software Engineer Apr 2024 – Oct 2025  
*New York, NY*

- Scaled an institutional web3 dashboard using ReactJS alongside the SDK that increased the AUM by 3x to \$700M+
- Led 4-person team to build 4 apps and bots powered by a REST API, RPC requests, and subgraphs, for 2K+ DAU
- Designed custom WalletConnect enabling users to execute transactions outside our app increasing revenue by +20%
- Integrated seamless on-chain JWT and API key authentication across the JS stack enabling 25+ partners to integrate

**Rebar Labs** | Founding Engineer & Advisor Oct 2023 – Apr 2024  
*Remote*

- Shipped analytics platform from 0 to 200+ alpha users in months; owned discovery and customer feedback loops
- Architected data infra ingesting 7 sources via AWS Athena and real-time pipelines; same shape backing RAG/agents
- Designed CI/CD, observability, and on-call patterns; led hiring and onboarding to scale team without losing velocity

**Suave Tech Solutions** | Founder Aug 2022 – Apr 2024  
*Remote*

- Consulted clients on topics from scaling AI sales to 50+ concurrent calls with WebRTC to writing 100+ specs
- Identified hundreds business issues, gaps, and opportunities for optimization enabling companies to scale and save
- Managed a team of 6 devs and 1 BD focusing on building web3, automations, and ecomm generating +\$50k/mo
- Engineered 60+ CRUD apps, automations, and SDK's with Nextjs, n8n, React, Node, Solidity, FastAPI, and more

**IBM iX** | Consultant & Software Engineer June 2021 - Aug 2022  
*Atlanta, GA*

- Piloted a ReactJS + Express dashboard to 3 local governments to manage 4K+ individuals' sensitive healthcare data
- Consulted local governments/clients on 100+ improvements and new features increasing monthly revenue by \$80k
- Collaborated with team lead and district manager weekly to scope sprints and discuss new ideas and bottlenecks

## EDUCATION

---

**New York University** | B.A. Economics, Minor in Computer Science and Mathematics May 2021

## SKILLS AND INTERESTS

---

### Technical Skills:

- AI / LLM: MCP (Model Context Protocol), agent design, prompt engineering, evaluation harnesses, tool-use, RAG
- Systems & Languages: TypeScript, Python, JS, Node, React Native, Rust, LUA, Solidity, SQL, n8n, R, VBA
- Infrastructure & DevOps: AWS (EC2, Fargate, Athena, Lambda), Kubernetes, Docker, Linux, CI/CD workflows
- Performance & Reliability: Benchmarking, Profiling, Data Pipelines, Testing, Monitoring, Metrics Analysis

### Languages:

- English (fluent), Romanian (fluent), Spanish (conversational)

### Interests:

- English Premier League, Motorsports, Piano, Trumpet, Criminal Minds, Hiking, Traveling, Photography
